**PUBLIC MEETING SET FOR THE
CLAYTON AVENUE - STORMWATER SYSTEM IMPROVEMENTS PROJECT**
*Metro officials and the design team will update the community on the status of planned
improvements*

NASHVILLE, TENNESSEE – The Stormwater Division of Metro Water Services will be hosting a public meeting to discuss a potential storm water improvement project, primarily located in the area south of Sevier Park between Clayton Avenue and Gale Lane.

WHAT: STORMWATER SYSTEM IMPROVEMENT PROJECT – PUBLIC MEETING

WHEN: 6:00 P.M., THURSDAY, FEBRUARY 16, 2012

WHERE: GREEN HILLS BRANCH LIBRARY – 3701 BENHAM AVENUE

The proposed storm water improvement project is in response to the continuous flooding concerns in this area. We have determined that the flooding is the result of channel restrictions at the following locations:

- Culvert under Clayton Avenue;
- Pedestrian bridges located at 1007, 1009 Clayton Ave., and 1008 Gale Lane;
- Double 36-inch culverts located at 1006 Gale Lane;
- Fencing across the channel at 1006 Gale Lane;
- Driveway culverts at 1011 Clayton Ave. and 1000 Gale Lane;
- Channel size at 1011 and 1013 Clayton Ave. and 3112 Lealand Lane.

The project will involve the removal of trees and other vegetation in the area, the removal of private fencing, as required, the removal of pedestrian bridges, the reconstruction of driveway crossings, the removal of pipes located in the channel and enlarging the channel. Permanent and temporary easements will be required for this project. This meeting will give you an opportunity to see the extent of the potential project and how your property will be impacted by it. This meeting will also give us an opportunity to address any concerns or issues that you may have as a result of this project.
